MHARC IRLP

Frequency; 147.570 MHz Simplex 100Hz. Tone

Our Node Number: 1188

To connect:

To connect to a node or reflector simply key up your radio, identify yourself and the node you're calling the dial the 4 digit number for that node/reflector.

To disconnect: Key your mic, dial 73

Important Notes:

- PAUSE - PAUSE - PAUSE! - Wait after keying your mic to allow the IRLP system to key up all the nodes and get everything going. If you start talking too fast you will get cut off.
- Remember to disconnect!
- The node is currently on simplex but the plan is to link it in to our repeaters. I will send out an email as this develops.
- The node is primarily for club members. Although there is currently no restriction to who can use the node, if others want to use it please encourage them to pay their \$20 membership to help the club out.
- If you are having problems with the node, or it is causing problems please send us an email to mharc@hotmail.ca and we will look at it asap.

Some Nets:

- 0300 UTC – Weekdays Saskatchewan 2 meter linking net on reflector 9300 or as an alternate 9012.
- 1500 UTC- Wednesdays - Cross Canada IRLP net on reflector 9010.

Where to find more info:

- <http://www.irlp.net> - General IRLP Info
- <http://status.irlp.net> - Lists of the status and location of all nodes and reflector

Note: 9990 – is a test link to an echo reflector to see what you sound like.
